

# State of South Carolina

## InfoSec and Privacy Training Framework

Start

# Introduction

---

The development of a training framework is part of the State of South Carolina's (State) initiative to create a Professional Development Program (PDP). The training framework is one of the activities that the State has taken to deploy a PDP that will evolve to provide a career path for Information Security (InfoSec) and Privacy personnel and increase the security posture of the organization. The training framework provides a catalog of coursework for the core InfoSec and Privacy workforce to establish training opportunities.

Clearly defined courses and certifications will encourage growth and ownership of InfoSec and Privacy domains at each State agency, and in turn increase InfoSec and privacy compliance and competency.

## Training Framework Layout

---

InfoSec and Privacy industry authoritative sources were taken into consideration to compile the training framework. The InfoSec and Privacy Competency Model was aligned to the training courses and certifications to increase alignment with the remainder of the PDP and security growth and posture.

InfoSec and Privacy personnel can use the framework in a variety of ways to strategically work toward professional development. All audiences can search training courses by:

- [Competency](#)
- [Certification](#)
- [Position Description](#)

# InfoSec and Privacy Training by Competency

InfoSec Governance and Compliance	Risk Strategy and Management	Threat and Vulnerability Management	Privacy	Data Security	IS Acquisition, Development and Maintenance	Physical and Environmental Security	Business Continuity Management and Disaster Recovery	Network and Infrastructure Security	Identity Access Management	Education and Training
<a href="#">InfoSec program management</a>	<a href="#">Risk assessment</a>	<a href="#">Vulnerability management</a>	<a href="#">Privacy program administration</a>	<a href="#">Data management</a>	<a href="#">System development lifecycle</a>	<a href="#">Physical access controls</a>	<a href="#">Business impact assessment</a>	<a href="#">Secure network engineering</a>	<a href="#">Access management</a>	<a href="#">Training needs analysis</a>
<a href="#">InfoSec regulation</a>	<a href="#">Risk acceptance</a>	<a href="#">Security incident and event management</a>	<a href="#">Privacy compliance</a>	<a href="#">Secure data transmission and storage</a>	<a href="#">Secure software development</a>	<a href="#">Environmental security</a>	<a href="#">Business continuity planning</a>	<a href="#">Network defense analysis and control</a>	<a href="#">Identity management</a>	<a href="#">Training curriculum design and development</a>
<a href="#">Policy communication, enforcement and exception management</a>	<a href="#">Risk mitigation</a>	<a href="#">Forensics analysis</a>	<a href="#">Privacy impact assessment</a>	<a href="#">Cryptographic safeguards</a>	<a href="#">Procurement methods</a>	<a href="#">Equipment cleansing and disposal</a>	<a href="#">Data backup and restoration</a>			<a href="#">Training delivery</a>
		<a href="#">Threat identification and categorization</a>	<a href="#">Data classification</a>				<a href="#">Crisis management</a>			
			<a href="#">Privacy incident response</a>							

The InfoSec and Privacy Competency Model is comprised of 11 domains and 35 associated competencies, outlined above. Each competency maps to a selection of training courses and provides a corresponding level of proficiency.

There are further training courses available to strengthen competencies which are not featured under the Position Descriptions.

# InfoSec and Privacy Position Descriptions

## Core<sup>1</sup>:

- [GRC Manager](#)
- [Information Privacy Analyst](#)
- [Information Privacy Manager](#)
- [InfoSec Analyst](#)
- [InfoSec and Privacy Auditor](#)
- [InfoSec Architect](#)
- [InfoSec Engineer](#)
- [InfoSec Manager](#)

## Hybrid<sup>2</sup>:

- [IT Director](#)
- [Network Administrator](#)
- [Program Manager \(Compliance / Privacy\)](#)
- [Program Manager \(Compliance / Security\)](#)

12 Position Descriptions were created to capture the roles and responsibilities necessary to support InfoSec and privacy. Each Position Description maps to a selection of training courses and corresponding position level.

Additional training courses that are not featured in the Position Descriptions may be explored by searching courses by Competency.

**Click each position description to see associated training courses**

<sup>1</sup> Core employees are defined as employees dedicated full-time to InfoSec and/or Privacy roles and responsibilities

<sup>2</sup> Hybrid employees are defined as staff that have both InfoSec/Privacy and non-InfoSec/Privacy roles and responsibilities

Data security	Secure data transmission and storage	<u>EMC2: Proven Professional Information Storage Associate v2</u>		x	x

# Certification:

## EC-Council Network Security Administrator (ENSA)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Network and infrastructure security	Network defense analysis and control	<u><a href="#">EC Council: Network Security Administrator (ENSA) Training</a></u>		x	x
	Secure network engineering			x	x
				x	x

# Certification:

## GIAC Auditing Wireless Networks (GAWN)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Vulnerability management	<u>SANS - SEC617: Wireless Ethical Hacking, Penetration Testing, and Defenses</u>		x	x

# Certification:

## GIAC Critical Controls Certification (GCCC)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
InfoSec governance and compliance	Policy communication, enforcement and exception management	<a href="#"><u>SANS - SEC566: Implementing and Auditing the Critical Security Controls - In-Depth</u></a>		x	x

# Certification:

## GIAC Certified Enterprise Defender (GCED)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and Vulnerability Management	Threat Identification and Categorization	<u><a href="#">SANS - SEC501: Advanced Security Essentials - Enterprise Defender</a></u>		x	x
Network and Infrastructure Security	Network Defense Analysis and Control				

# Certification:

## GIAC Certified Forensic Analyst (GCFA)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Forensic analysis	<u><a href="#">SANS - FOR508: Advanced Computer Forensic Analysis and Incident Response</a></u>			x
	Security incident and event management				x

# Certification:

## GIAC Certified Incident Handler (GCIH)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Security incident and event management	<u>SANS - SEC504: Hacker Techniques, Exploits &amp; Incident Handling</u>		x	x

# Certification:

## GIAC Information Security Fundamentals (GISF)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
InfoSec governance and compliance	InfoSec program management	<u>SANS - SEC301: Intro to Information Security</u>	x	x	x

# Certification:

## GIAC Law of Data Security & Investigations (GLEG)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
InfoSec Governance and Compliance	InfoSec Regulation	<u><a href="#">SANS - LEG523: Law of Data Security and Investigations</a></u>	x	x	x

# Certification:

## GIAC Network Forensic Analyst (GNFA)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Forensics analysis	<a href="#">SANS - FOR572: Advanced Network Forensics and Analysis</a>			x

# Certification:

## GIAC Penetration Tester (GPEN)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Vulnerability management	<u>SANS - SEC560: Network Penetration Testing and Ethical Hacking</u>		x	x

# Certification:

## GIAC Certified Reverse Engineering Malware (GREM)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Forensics analysis	<u>SANS - FOR610: Reverse-Engineering Malware: Malware Analysis Tools and Techniques</u>		x	x

# Certification:

## GIAC Security Essentials (GSEC)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
InfoSec governance and compliance	InfoSec program management	<u>SANS - SEC401: Security Essentials Bootcamp Style</u>		x	x

# Certification:

## GIAC Security Leadership Certification (GSLC)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
InfoSec governance and compliance	InfoSec program management	<u>SANS - MGT512: Security Leadership Essentials for Manager with Knowledge Compression</u>			x

# Certification:

## GIAC Secure Software Programmer .NET (GSSP-.NET)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
IS acquisition, development and maintenance	Secure software development	<u>SANS – DEV544: Secure Coding in .NET: Developing Defensible Applications</u>		x	x

# Certification:

## GIAC Secure Software Programmer Java (GSSP-JAVA)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
IS acquisition, development and maintenance	Secure software development	<u><a href="#">SANS - DEV541: Secure Coding in Java/JEE: Developing Defensible Applications</a></u>		x	x

# Certification:

## GIAC Certified Web Application Penetration Tester (GWAPT)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
Threat and vulnerability management	Vulnerability management	<u>SANS - SEC542: Web App Penetration Testing and Ethical Hacking</u>		x	x

# Certification:

## GIAC Certified Web Application Defender (GWEB)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
IS acquisition, development and maintenance	Secure software development	<u><a href="#">SANS - DEV522: Defending Web Applications Security Essentials</a></u>	x	x	x

# Certification:

## Information Systems Security Architecture Professional (ISSAP)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
IS acquisition, development and maintenance	System development lifecycle	<u>ISC2: Information Systems Security Architecture Professional Training</u>	x	x	x

# Certification:

## Information Systems Security Engineering Professional (ISSEP)

Domain	Competency	Course	Proficiency Level		
			Level 1	Level 2	Level 3
IS acquisition, development and maintenance	System development lifecycle	<u>ISC2: Information Systems Security Engineering Professional Training</u>	x	x	x

# Certification:

InfoSec governance and compliance	InfoSec program management	<u>ISC2: System Security Certified Practitioner (SSCP) Training</u>		x	x

# Appendix

# Course Description

## ATD: Designing Learning Certificate

- Course that provides all of the tools necessary to develop powerful, bottom-line focused training. It provides best practices for conducting a needs assessment, job/task analysis, and course design and development
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/Designing-Learning-Certificate>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Advanced E-Learning Instructional Design Certificate

- Course that provides expert techniques vital to design effective e-learning that achieves lasting performance change. The course provides general development guidelines and time requirements for designing a successful e-learning event
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/Advanced-E-Learning-Instructional-Design-Certificate>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Essentials of Coaching Government Employees on the Job

- Course that demonstrates how the regular use of a coaching model and supporting language techniques can lead to measurable development on the job. Throughout the program, participants practice the tools using real government examples and situations, and they leave the program with a coaching approach to foster learning on the job
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/Coaching-Government-Employees-on-the-Job>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Evaluating Learning Impact Certificate

- Course that helps participants to determine the impact of learning programs and develop and implement an evaluation strategy for the organization. Participants will receive a solid foundation in all aspects of the measurement and evaluation of learning and performance solutions
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/Evaluating-Learning-Impact-Certificate>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Facilitating Synchronous Learning Certificate

- This online course provides ten hours of live, online instruction where participants will learn to maximize the engagement of remote participants and manage the logistics of facilitating synchronous learning
- Please visit the following website for additional information:

<https://www.td.org/Education/Programs/Facilitating-Synchronous-Learning-Certificate>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Introduction to Training Certificate

- High-level introductory course to gain a foundation in delivering training events. The course provides proven techniques for facilitating engaging and result-oriented training sessions
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/Introduction-to-Training-Certificate>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Master Instructional Designer Program

- This course covers the entire process of analysis, design, development, implementation, and evaluation of learning programs. In addition, this program explores new design models and techniques that align with emerging needs
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/ATD-Master-Instructional-Designer>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Master Trainer Program

- Assessment-based certificate program that provides the opportunity to evaluate real-world projects, and master the skills required to create formal and informal learning
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/ATD-Master-Trainer>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Presentation Skills Certificate

- During this program you will learn proven tips and examples that will guide you through the presentation process no matter how large the audience
- Please visit the following website for additional information:

<https://www.td.org/Education/Programs/Presentation-Skills-Certificate>

\* ASTD has been renamed as ATD

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ATD: Training Certificate

- Premier train-the-trainer program that provides a practical, how-to overview of the entire training function. New trainers will gain a strong foundation in critical training skills and seasoned trainers will be introduced to new approaches for delivering powerful training
- Please visit the following website for additional information:

<http://www.ATD.org/Education/Programs/Training-Certificate>

## Defense Cyber Investigation Training Academy: Cyber Insider Threats Analysis Training

- Course that defines insider threat, examines relevant laws and regulations, and explores motivations and indicators of insider threat agents
- Please visit the following website for additional information:

<https://www.dcita.edu/courses.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Defense Cyber Investigation Training Academy: Introduction to Cyber Insider Threat Course

- Scenario-based online course that introduces the insider threat and presents methods for investigation and analysis
- Please visit the following website for additional information:

<https://www.dcita.edu/courses.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

# Course Description

## Defense Cyber Investigation Training Academy: Introduction to Networks and Computer Hardware

- Course that teaches basic computer and network component identification and function, along with the foundational theory cyber investigators must understand
- Please visit the following website for additional information:

<https://www.dcita.edu/courses.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Defense Cyber Investigation Training Academy: Introduction to Log Analysis

- The course objective is to provide students with a comprehensive understanding of log analysis techniques. Students learn how to process logs from Windows and Linux operating systems, firewalls, intrusion detection systems, and Web and e-mail servers. Students also learn how to assemble evidence found in logs to assist in tasks ranging from building a case to recognizing an intrusion
- Please visit the following website for additional information:

<https://www.dcita.edu/courses.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## DRII: BCOE 300 Introduction to Business Impact Analysis

- Learn the purpose, objectives and value of conducting a business impact analysis. The student will understand methodologies, terms, and definitions, such as mission-critical business processes, recovery time objectives (RTO), and acceptable exposure to loss
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## DRII: BCOE 500 Emergency Preparedness and Response

- Learn and understand the emergency management structure and the planning necessary to manage a crisis for your organization. This will include identification, escalation, and notification procedures. This course covers the challenges of reviewing and coordinating emergency evacuation programs in place in organizations, or working with the responsible areas to develop or enhance existing programs
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

# Course Description

## DRII: BCOE 900 Crisis Communication and Coordinating with External Agencies

- All plans must include communication elements, and this course is designed to assist the student in making All the necessary preparations for managing an emergency. Learn how to develop procedures that will allow you to effectively communicate with All audiences, to identify and train spokespersons, to develop key messages, and to work effectively with the media
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## DRII: BCOE 600 Business Continuity Plan Implementation

- Learn the application of skills and information gathered in putting the BCM program into action by identifying the components of the planning process including plan methodology, implementation, organization, and documentation
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## DRII: BCOE 400 Developing Business Continuity Strategies

- Learn the challenges of selecting the appropriate strategies for recovery of business processes, critical functions, operations and the supporting information technologies within the specified recovery time objective. It defines alternative strategies, assesses the strengths and weaknesses of strategies and methodologies for presentation to management. We will identify the process steps involved in the analysis and strategy determination. This will be linked directly and supported by the data gathering activities accomplished during the risk assessment and BIA
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## DRII: BCOE 800 Exercising and Maintaining Plans

- Identify the components needed to establish an exercise, testing, maintenance and audit program. To continue to be effective, a business continuity management (BCM) program must implement a regular exercise schedule to establish confidence in a predictable and repeatable performance of recovery activities throughout the organization
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## DRII: BCOE 100 Program Management Principles in Business Continuity Planning

- Learn how to establish the need for a business continuity program in your organization and how to obtain management support. You will also learn how to organize and manage the process of developing a business continuity program. This course identifies the requirements and imperatives of project management methodologies required to develop an enterprise-wide business continuity program
- Please visit the following website for additional information:

<https://www.drii.org/education/trainings.php>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Certified Chief Information Security Officer (CCISO) Training

- In-person and online training options that provides all fundamental knowledge to obtain Chief Information Security Officer (CCISO) certification. This certification will provide your employers with the assurance that you possess the proven knowledge and experience to plan and oversee Information Security for the entire corporation
- Please visit the following website for additional information:

<https://cert.eccouncil.org/certified-chief-information-security-officer.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Certified Ethical Hacker (CEH) Training

- Ethical hacking course with 19 of the most current security domains any ethical hacker will ever want to know when they are planning to beef up the information security posture of their organization. This course prepares participants for EC-Council Certified Ethical Hacker (CEH) exam 312-50
- Please visit the following website for additional information:

<http://www.eccouncil.org/Certification/certified-ethical-hacker>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Computer Hacking Forensic Investigator (CHFI) Training

- This course presents a detailed methodological approach to computer forensics and evidence analysis. It is a comprehensive course covering major forensic investigation scenarios that enable students to acquire hands-on experience on various forensic investigation techniques and standard tools necessary to successfully carry-out a computer forensic investigation
- Please visit the following website for additional information:

<http://www.eccouncil.org/Certification/professional-series/chfi-course-outline>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

# Course Description

## EC Council: Certified Network Defense Architect (CNDA) Training

- This course has been specially designed for Government Agencies around the world. This course prepares participants to become Certified Network Defense Architect (CNDA). Other than the name the content is exactly the same as the Certified Ethical Hacker (CEH)
- Please visit the following website for additional information:

<http://www.eccouncil.org/Certification/certified-network-defense-architect>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Certified Security Analyst (ECSA) Training

- Training program which teaches information security professionals to conduct real life penetration tests using real time scenarios. It prepares participants to achieve EC-Council Security Analyst (ECSA) certification
- Please visit the following website for additional information:

<https://www.eccouncil.org/about-ec-council-certified-security-analyst>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Certified Security Specialist (ECSS) Training

- This course will benefit the students who are interested in learning fundamentals of information security, network security, and computer forensics. It will prepare students to obtain EC-Council Certified Security Specialist (ECSS) certification
- Please visit the following website for additional information:

<http://www.eccouncil.org/Certification/ec-council-certified-security-specialist>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Disaster Recovery Professional (EDRP) Training

- This course teaches participants the methods in identifying vulnerabilities and taking appropriate countermeasures to prevent and mitigate failure risks for an organization. It prepares students to prepare for the EC-Council Disaster Recovery Professional Training (EDRP) certification
- Please visit the following website for additional information:

<http://www.eccouncil.org/Certification/ec-council-disaster-recovery-professional>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Network Security Administrator (ENSA) Training

- Training program that provides fundamental skills needed to analyze the internal and external security threats against a network, and to develop security policies that will protect an organization's information. It prepares participants to achieve EC-Council Network Security Administrator (ENSA) certification
- Please visit the following website for additional information:

<http://www.eccouncil.org/Certification/ec-council-network-security-administrator>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EC Council: Licensed Penetration Tester (LPT) Training

- Licensed Penetration Tester (LPT) program teaches the report writing skills of the professional pen tester. The LPT program was also designed to evaluate the student's capabilities of performing penetration tests in real-time scenarios on an active cyber range
- Please visit the following website for additional information:

<http://www.eccouncil.org/about-licensed-penetration-tester>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EHRs and HIPAA: Steps for Maintaining the Privacy and Security of Patient Information

- The goal of this activity is to summarize steps for incorporating security standards of the Health Insurance Portability and Accountability Act (HIPAA) into an electronic health record
- Please visit the following website for additional information:

<http://www.medscape.org/viewarticle/821650>

\* User will need to create a free Medscape account to view content

*[Go back to InfoSec and Privacy Training by Competency](#)*

*[Go back to InfoSec and Privacy Training by Certification](#)*

*[Go back to InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EMC2: Backup Recovery Systems and Architecture

- This course provides participants with a solid foundation in Backup and Recovery infrastructure. It teaches participants about backup and recovery theory, including backup methods, planning, and key terminology
- Please visit the following website for additional information:

[https://education.emc.com/academicalliance/documents/EAA\\_backup\\_recovery\\_one-pager.pdf](https://education.emc.com/academicalliance/documents/EAA_backup_recovery_one-pager.pdf)

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EMC2: Information Storage and Management v2

- This course builds a strong understanding of underlying storage technologies and prepares students to learn advanced concepts, technologies and products. It provides a comprehensive learning on storage technology, which will enable students to make more informed decisions in an increasingly complex IT environment
- Please visit the following website for additional information:

<https://education.emc.com/guest/campaign/InformationStorageandManagement.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## EMC2: Proven Professional Information Storage Associate v2

- This course covers storage architectures and key data center elements, physical and logical components of a storage infrastructure, storage networking technologies . This course prepares participants to obtain Proven Professional Information Storage Associate v2 certification (EMCISA)
- Please visit the following website for additional information:

[https://education.emc.com/guest/campaign/InformationStorageandManagement.aspx?WT.mc\\_id=web\\_emccom\\_ISMV2\\_4114](https://education.emc.com/guest/campaign/InformationStorageandManagement.aspx?WT.mc_id=web_emccom_ISMV2_4114)

## InfoSec Institute: Certified in the Governance of Enterprise IT (CGEIT) Training (IA-212)

- This four day seminar will explain the Certified in the Governance of Enterprise IT (CGEIT) examination process. It will help participants prepare for the next CGEIT exam and provide guidance and test participants' readiness through sample questions
- Please visit the following website for additional information:

<http://www.infosecinstitute.com/courses/cgeit-training.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Computer Forensics Training (SEC-203)

- During InfoSec Institute's Computer Forensics Training course participants will see the dark side of how computer crimes are committed, learn how to find traces of illegal or illicit activities left on disk with computer forensics tools and manual techniques, and learn how to recover data intentionally hidden or encrypted by perpetrators
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/computer\\_forensics\\_training.html](http://www.infosecinstitute.com/courses/computer_forensics_training.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Cryptography Short Course (CISSP Domain #5)

- The cryptography section on the Certified Information Systems Security Professional (CISSP) exam has proven to be one of the most difficult domains for many of our students. This short course takes you through the domain as it relates to the CISSP exam
- Please visit the following website for additional information:

<http://resources.infosecinstitute.com/mini-course/cryptography-ciissp-training/>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Data Recovery Training (SEC-205)

- The InfoSec Institute Data Recovery course provides an in-depth and hands-on exposure to the most hands on and highly technical logical and physical data recovery course available anywhere
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/data\\_recovery\\_training.html](http://www.infosecinstitute.com/courses/data_recovery_training.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Enterprise Security Architecture and Design Online (ONL-212)

- During this course, participants will learn the essentials of Enterprise Security Design for security engineering. This course will bring participants up to speed on the latest security-specific architecture. It will show participants how to implement the myriad of security technologies available on the market today in an effective and cost efficient manner
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/security\\_architecture\\_design\\_online.html](http://www.infosecinstitute.com/courses/security_architecture_design_online.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Expert Penetration Testing (SEC-209)

- The InfoSec Institute Expert Hacking course provides an in-depth and hands-on review of the most current exploit development strategies and techniques for the Microsoft Windows platform
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/expert\\_penetration\\_testing\\_training.html](http://www.infosecinstitute.com/courses/expert_penetration_testing_training.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Information Security Policy Essentials (SEC-211)

- This two day course provides guidance on critical information security policy elements, communicating the policy organization-wide and executive reporting. This course explores the process of creating security policies, reviews standards and methodologies, and evaluates example policies
- Please visit the following website for additional information:

<http://www.infosecinstitute.com/courses/security-policy-essentials-training.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Intrusion Prevention Online (SEC-204)

- The Intrusion Prevention training offered by InfoSec Institute covers all areas of intrusion prevention. During this course, participants will learn the technical details that make Intrusion Prevention Systems so effective
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/intrusion\\_prevention\\_online.html](http://www.infosecinstitute.com/courses/intrusion_prevention_online.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Mobile Device Penetration Testing (SEC-556)

- This course covers security risks and controls on both the mobile platform as well as the presentation layer. During this course, participants will get hands-on experience with the top threats that organizations are facing when targeting mobile and BYOD devices
- Please visit the following website for additional information:

<http://www.infosecinstitute.com/courses/mobile-pen-testing-training.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Penetration Testing Online (ONL-206)

- During this course, participants will learn everything there is to know about penetration testing, from the use of network reconnaissance tools, to the writing of custom zero-day buffer overflow exploits
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/penetration\\_testing\\_online.html](http://www.infosecinstitute.com/courses/penetration_testing_online.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: SCADA Security (SEC-325)

- This course will provide participants the skills required to direct and manage the appropriate cyber security protection for your SCADA system
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/scada\\_security\\_training.html](http://www.infosecinstitute.com/courses/scada_security_training.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## InfoSec Institute: Web Application Penetration Testing (SEC-402)

- The Web Application Penetration Testing course from InfoSec Institute is a totally hands-on learning experience. From the first day to the last day, participants will learn the ins and outs of Web App Pen Testing by attending thought provoking lectures led by an expert instructor
- Please visit the following website for additional information:

[http://www.infosecinstitute.com/courses/web\\_application\\_hacking\\_training.html](http://www.infosecinstitute.com/courses/web_application_hacking_training.html)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISACA: An Introduction to Privacy and Data Protection

- This course analyzes the risk and value of personal information from different perspectives and outlines the consequences of privacy failures. It explores how organizations can govern, manage, and protect regulated and high value data to manage the risk of non-compliance, information misuse, unauthorized access, and loss
- Please visit the following website for additional information:

<http://www.isaca.org/Education/Training/Pages/An-Introduction-to-Privacy-and-Data-Protection-Miami.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISACA: Certified Information Systems Auditor (CISA) Training

- This course provides an excellent tool for Certified Information Systems Auditor (CISA) certification exam review and continuing professional education. The course features descriptions of the tasks performed by IS auditors and the knowledge required to plan, manage and perform information security audits
- Please visit the following website for additional information:

<http://www.isaca.org/Education/Training/exam-review-courses/Pages/CISA-Online-Review-Course.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISACA: Certified Information Security Manager (CISM) Training

- This training has been developed to assist those who plan to sit for the Certified Information Security Manager (CISM) exam. The 4-day review course focuses on the key points covered in the exam then followed by class practice questions and discussions
- Please visit the following website for additional information:

<http://www.isaca.org/Certification/CISM-Certified-Information-Security-Manager/Prepare-for-the-Exam/Review-Courses/Pages/default.aspx#northamerica>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISACA: Certified in Risk and Information Systems Control (CRISC) Training

- The review program has been developed to assist those who plan to sit for the Certified in Risk and Information Systems Control (CRISC) exam. The 4-day review course focuses on the key points covered in the exam then followed by class practice questions and discussions
- Please visit the following website for additional information:

<http://www.isaca.org/Certification/CRISC-Certified-in-Risk-and-Information-Systems-Control/Prepare-for-the-Exam-OLD/Pages/Review-Courses.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Certified Authorization Professional (CAP) Training

- The Certified Authorization Professional (CAP) course is designed for information security practitioner who champions system security commensurate with an organization's mission and risk tolerance, while meeting legal and regulatory requirements
- Please visit the following website for additional information:

<https://www.isc2.org/cap-training.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Certified Cyber Forensics Professional (CCFP) Training

- The Certified Cyber Forensics Professional (CCFP) course is designed for intermediate to advanced professionals who possesses at least 3 years of experience in the areas of: forensic techniques and procedures, standards of practice, and legal and ethical principles that assure the accuracy, completeness, and reliability of digital evidence
- Please visit the following website for additional information:

<https://www.isc2.org/CCFP-training/default.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Certified Information Systems Security Professional (CISSP) Training

- This training course will help candidates review and refresh their information security knowledge and help identify areas they need to study for the CISSP exam. The CISSP exam covers critical topics in security today, including risk management, cloud computing, mobile security, application development security and more
- Please visit the following website for additional information:

<https://www.isc2.org/cissp-training.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Certified Secure Software Lifecycle Professional (CSSLP) Training

- The Certified Secure Software Lifecycle Professional (CSSLP) course is the largest, most comprehensive, collection of best practices, policies, and procedures, to ensure a security initiative across all phases of application development
- Please visit the following website for additional information:

<https://www.isc2.org/csslpedu/default.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: HealthCare Information Security and Privacy Practitioner (HCISPP) Training

- The HealthCare Information Security and Privacy Practitioner (HCISPP) training is the most comprehensive review of healthcare security and privacy concepts and industry best practices.
- Please visit the following website for additional information:

<https://www.isc2.org/HCISPP-training/default.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Information Systems Security Architecture Professional (ISSAP) Training

- This training is the perfect way to assure competence of the six major domains of the Information Systems Security Architecture Professional (ISSAP) Concentration. This course is designed for CISSPs who specialize in designing security solutions and providing management with risk-based guidance to meet organizational needs
- Please visit the following website for additional information:

<https://www.isc2.org/issaprevsem/default.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Information Systems Security Engineering Professional (ISSEP) Training

- This training is the perfect way to assure competence of the four major domains of the Information Systems Security Engineering Professional (ISSEP) Concentration
- Please visit the following website for additional information:

<https://www.isc2.org/isseprevsem/default.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: Information Systems Security Management Professional (ISSMP) Training

- This training course will help candidates review and refresh their information security knowledge and help identify areas they need to study for the CISSP-ISSMP exam
- Please visit the following website for additional information:

<https://www.isc2.org/issmprevsem/default.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## ISC2: System Security Certified Practitioner (SSCP) Training

- This training is the key to success in pursuing the System Security Certified Practitioner (SSCP) certification. It is the most comprehensive, complete review of the information systems security concepts and industry best practices covered by the SSCP domains
- Please visit the following website for additional information:

<https://www.isc2.org/sscp-training.aspx>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Langevin: Training Needs Analysis

- This e-learning module gives you a faster needs analysis approach that is realistic in today's climate. It shows you how to apply a highly effective procedure for determining whether or not training is the solution to a job performance problem. It will help you develop the key skills and confidence to gain acceptance and recognition for your recommendations to management
- Please visit the following website for additional information:

<http://www.langevin.com/workshops/view/training-needs-analysis>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Digital Forensics Examiner (CDFE) Training

- The Certified Digital Forensics Examiner (CDFE) course will benefit organizations, individuals, government offices, and law enforcement agencies in performing digital forensics and reporting findings
- Please visit the following website for additional information:

<http://mile2.com/digital-forensics-courses/certified-digital-forensics-examiner.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Disaster Recovery Engineer (CDRE) Training

- The Certified Disaster Recovery Engineer (CDRE) course covers disaster recovery and business continuity planning. It is comprised of 11 modules. During the course students will perform different DR/BC exercises including spending all of the fourth day writing their own disaster recovery/business continuity plan
- Please visit the following website for additional information:

<https://www.mile2.com/disaster-recovery-business-continuity-planning.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Incident Handling Engineer (CIHE) Training

- The Certified Incident Handling Engineer (CIHE) 4 day course is designed to help Incident Handlers, System Administrators, and Cyber Security Engineers understand how to plan, create and utilize their systems in order to prevent, detect and respond to attacks
- Please visit the following website for additional information:

<https://mile2.com/mile2-online-estore/classes/cihe-certified-incident-handling-engineer-shop.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Information Systems Security Manager (CISSM) Training

- The Certified Information Systems Security Manager (CISSM) course provides the student with the knowledge and proficiency to prepare for the globally recognized CISSM certification exam. This course will provide the student the tools to build their technical skills to manage, design, oversee and assess an enterprise's information security systems
- Please visit the following website for additional information:

<https://mile2.com/mile2-online-estore/classes/cissm-certified-information-systems-security-manager-shop.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Information Systems Security Officer (CISSO) Training

- The Certified Information Systems Security Officer (CISSO) course prepares individuals to analyze an organization's information security threats and risks, and design a security program to mitigate these risks. This course is designed to help students become Certified Information Systems Security Officer
- Please visit the following website for additional information:

<https://www.mile2.com/mile2-online-estore/classess/certified-information-systems-security-officer-shop.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Information Systems Security Risk Manager (CISSRM) Training

- Course that provides fundamental knowledge to become Certified Information Systems Security Risk Manager (CISSRM). Course will be released in fourth quarter of 2015
- Please visit the following website for additional information:

<http://www.mile2.com/mile2-courses.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Network Forensics Examiner (CNFE) Training

- The Certified Network Forensics Examiner (CNFE) course helps students to understand exactly what is going on in a network to ensure its proper use by those instructed with access. It will enhance students' digital forensic competence by adding more advanced network forensics expertise and experience through discussions and practice
- Please visit the following website for additional information:

<http://mile2.com/general-security-courses/certified-network-forensics-examiner.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Professional Ethical Hacker (CPEH) Training

- The Certified Professional Ethical Hacker (CPEH) course helps students gain a valuable skill-set in penetration testing by understand the importance of vulnerability assessments and ethical hacking
- Please visit the following website for additional information:

<http://mile2.com/penetration-testing-ethical-hacking/cpeh.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Penetration Testing Consultant (CPTC) Training

- The Certified Penetration Testing Consultant (CPTC) course provides the knowledge and skills to plan, manage and perform a penetration test
- Please visit the following website for additional information:

<http://www.mile2.com/penetration-testing-ethical-hacking/certified-penetration-testing-expert.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Penetration Testing Engineer (CPTe) Training

- The Certified Penetration Testing Engineer (CPTe) course trains students on the 5 key elements of penetration testing: information gathering, scanning, enumeration, exploitation and reporting
- Please visit the following website for additional information:

<http://mile2.com/penetration-testing-ethical-hacking/cpte.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Security Leadership Officer (CSLO) Training

- The Certified Security Leadership Officer (CSLO) course is designed and taught for mid to C level managers as well as any engineers who seek to increase their knowledge in the cyber security arena. The CSLO will give you the ability to better manage IT projects in a secure manner
- Please visit the following website for additional information:

<https://mile2.com/mile2-online-estore/classess/cslo-certified-security-leadership-officer-shop.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Security Sentinel (CSS) Training

- The Certified Security Sentinel (CSS) certification course is intended for anyone that uses a computer on the internet. Attendees will fully understand the security threats that attack daily and countermeasures associated with these attacks
- Please visit the following website for additional information:

<http://www.mile2.com/general-security-courses/certified-security-sentinel.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Mile2: Certified Vulnerability Assessor (CVA) Training

- The Certified Vulnerability Assessor (CVA) training will help students to understand the importance of vulnerability
- Please visit the following website for additional information:

<http://www.mile2.com/general-security-courses/certified-vulnerability-assessor.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## NIGP: Contract Administration

- The Contract Administration in the Public Sector provides essential knowledge for you to better understand and master the world of public procurement
- Please visit the following website for additional information:

<http://www.nigp.org/eweb/StartPage.aspx?Site=NIGP&webcode=pd-05-ep-ot-cd>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## NIGP: Ethics A Survival Kit for Public Procurement

- This course will introduce the student to ethical practices needed during the procurement process. It is designed to offer a practical hands-on approach to ethical decision-making in the public procurement process by engaging in exercises and case studies that reinforce presented concepts
- Please visit the following website for additional information:

<http://www.nigp.org/eweb/StartPage.aspx?Site=NIGP&webcode=pd-13-ep-ot-cd>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## NIGP: Introduction to Public Procurement

- This course provides an overview of fundamental concepts that impact procurement in the public sector
- Please visit the following website for additional information:

[http://www.nigp.org/eweb/DynamicPage.aspx?Site=NIGP&WebCode=InstEvent&Reg\\_evt\\_key=a2fdd1a7-d747-45dc-890a-7f352dc04c57](http://www.nigp.org/eweb/DynamicPage.aspx?Site=NIGP&WebCode=InstEvent&Reg_evt_key=a2fdd1a7-d747-45dc-890a-7f352dc04c57)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## NIGP: Sourcing in the Public Sector

- This courses provide essential knowledge for you to better understand and master the world of public procurement. This course is intended for those who want to learn how to navigate the process and increase their understanding of the critical issues that frame the concept of public sector sourcing and discusses future sourcing challenges
- Please visit the following website for additional information:

<http://www.nigp.org/eweb/StartPage.aspx?Site=NIGP&webcode=pd-31-ep-ot-cd>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## NIGP: Specification Writing

- This online course addresses fundamental specification requirements in an applied learning setting
- Please visit the following website for additional information:

[http://www.nigp.org/eweb/DynamicPage.aspx?Site=NIGP&WebCode=InstEvent&Reg\\_evt\\_key=d81a1114-d432-48b1-9ee3-b669f0b37d92](http://www.nigp.org/eweb/DynamicPage.aspx?Site=NIGP&WebCode=InstEvent&Reg_evt_key=d81a1114-d432-48b1-9ee3-b669f0b37d92)

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## OpenSecurityTraining.info: Introduction to Software Exploits

- This class will cover both the identification of software vulnerabilities and the techniques attackers use to exploit them. In addition, current techniques that attempt to remediate the threat of software vulnerability exploitation will be discussed
- Please visit the following website for additional information:

<http://opensecuritytraining.info/IntroductionToSoftwareExploits.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## OpenSecurityTraining.info: Introduction to Vulnerability Assessment

- This is a lecture and lab based class giving an introduction to vulnerability assessment of some common computing technologies
- Please visit the following website for additional information:

<http://opensecuritytraining.info/IntroductionToVulnerabilityAssessment.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

# Course Description

## OpenSecurityTraining.info: Offensive, Defensive, and Forensic Techniques for Determining Web User Identity

- This course looks at web users from a few different perspectives. First, we look at identifying techniques to determine web user identities from a server perspective. Second, we will look at obfuscating techniques from a user whom seeks to be anonymous. Finally, we look at forensic techniques, which, when given a hard drive or similar media, we identify users who accessed that server
- Please visit the following website for additional information:

<http://opensecuritytraining.info/WebIdentity.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## OpenSecurityTraining.info: Understanding Cryptology: Cryptanalysis

- This course is a mixture of lecture designed to introduce students to a variety of code-breaking techniques and python labs to solidify those concepts
- Please visit the following website for additional information:

<http://opensecuritytraining.info/Cryptanalysis.html>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Pearson: CISSP Video Course Domain 2 - Access Control, Downloadable Version

- This lesson covers Access Control - which is a collection of mechanisms that work together to create security architecture to protect the assets of the information system
- Please visit the following website for additional information:

<http://www.pearsonitcertification.com/store/cissp-video-course-9780789739636>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Pearson: CISSP Video Course Domain 4 - Physical Security, Downloadable Version

- This lesson covers Physical (Environmental) Security - it addresses the threats, vulnerabilities and countermeasures that can be utilized to physically protect an enterprise's resources and sensitive information
- Please visit the following website for additional information:

<http://www.pearsonitcertification.com/store/cissp-video-course-9780789739636>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Pearson: CISSP Video Course Domain 7 - Telecommunications and Networking, Downloadable Version

- This lesson covers Telecommunications and Network Security - it discusses network structures, transmission methods, transport formats and security measures used to provide availability, integrity and confidentiality
- Please visit the following website for additional information:

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Privacy Professor – Privacy Impact Assessment (PIA) Tool Kit

- This 1 hour video describes the purposes and benefits of doing Privacy Impact Assessments (PIAs), when to do them, how to scope, key stakeholders to involve. It also provides high level PIA methodology, privacy standards to use for the PIA framework, an in-depth look at PIA questionnaires, documentation to review, in-depth review of a PIA report, PIA corrective action plans (CAPs).
- Please visit the following website for additional information:

<http://hipaaprivacy.org/product/privacy-impact-assessment-training/>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## Safari: CISSP Video Course Domain 4 – Physical Security

- This video course includes realistic labs, scenarios, case studies, and animations designed to build and test your knowledge around physical security
- Please visit the following website for additional information:

<https://www.safaribooksonline.com/library/view/cissp-video-course/9780789740175/>

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - DEV522: Defending Web Applications Security Essentials

- This course will help you to better understand web application vulnerabilities, thus enabling you to properly defend your organization's web assets
- Please visit the following website for additional information:

<http://www.sans.org/course/defending-web-applications-security-essentials>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - DEV536: Secure Coding: Developing Defensible Applications

- Throughout the course we will look at examples of the types of flaws that secure coding protects against, examine how the flaw might be exploited and then focus on how to correct that code
- Please visit the following website for additional information:

<http://www.sans.org/course/secure-coding-developing-defensible-applications>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - DEV543: Secure Coding in C & C++

- This course will cover all of the most common programming flaws that affect C and C++ code. Throughout the course students are asked to identify flaws in modern versions of common open-source software to provide hands-on experience identifying these issues in existing code
- Please visit the following website for additional information:

<http://www.sans.org/course/secure-coding-c-plus-plus>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - DEV541: Secure Coding in Java/JEE: Developing Defensible Applications

- This course teaches you the art of modern web defense for Java applications by focusing on foundational defensive techniques, cutting edge protections, and Java EE security features that you can use in your applications as soon as you return to work
- Please visit the following website for additional information:

<http://www.sans.org/selfstudy/course/secure-coding-java-jee-developing-defensible-applications>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - DEV544: Secure Coding in .NET: Developing Defensible Applications

- This course will help students leverage built-in and custom defensive technologies to integrate security into their applications
- Please visit the following website for additional information:

<http://www.sans.org/course/secure-coding-net-developing-defensible-applications>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR408: Windows Forensic Analysis

- This course focuses on a comprehensive and deep analysis of the latest Microsoft Windows operating systems. In this intermediate course, participants will learn directly how forensic analysts track the second-by-second trail left behind by evildoers used in successful criminal prosecution, incident response, media exploitation or civil litigation
- Please visit the following website for additional information:

<http://www.sans.org/course/windows-forensic-analysis>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR518: Mac Forensic Analysis

- This course will enable Windows-based investigators to broaden their analysis capabilities and have the confidence and knowledge to comfortably analyze any Mac or iOS system
- Please visit the following website for additional information:

<http://www.sans.org/event/for518-mac-forensic-analysis-2014/course/mac-forensic-analysis>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR408: Windows Forensic Analysis

- This course focuses on a comprehensive and deep analysis of the latest Microsoft Windows operating systems. In this intermediate course, participants will learn directly how forensic analysts track the second-by-second trail left behind by evildoers used in successful criminal prosecution, incident response, media exploitation or civil litigation
- Please visit the following website for additional information:

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR526: Memory Forensics In-Depth

- This course focuses on best practices and recommendations from experts in the field to guide Digital Forensics and Incident Response (DFIR) professionals through acquisition, validation, and memory analysis with real-world and malware-laden memory images. Having in-depth knowledge of Windows memory internals allows the examiner to access target data
- Please visit the following website for additional information:

<http://www.sans.org/course/memory-forensics-in-depth>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR572: Advanced Network Forensics and Analysis

- This course covers the tools, technology and processes required to integrate network evidence sources into the investigations, with a focus on efficiency and effectiveness
- Please visit the following website for additional information:

<http://www.sans.org/course/advanced-network-forensics-analysis>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR585: Advanced Smartphone Forensics

- This course covers the best tools currently available to conduct smartphone and mobile device forensics, and provide detailed instructions on how to manually decode data that tools sometimes overlook
- Please visit the following website for additional information:

<http://www.sans.org/course/advanced-smartphone-mobile-device-forensics>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR610: Reverse-Engineering Malware: Malware Analysis Tools and Techniques

- This training has helped forensic investigators, incident responders, security engineers, and IT administrators acquire the practical skills to examine malicious programs that target and infect Windows systems
- Please visit the following website for additional information:

<http://www.sans.org/course/reverse-engineering-malware-malware-analysis-tools-techniques>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - LEG523: Law of Data Security and Investigations

- This course provides training and continuing education for many compliance programs under information security and privacy mandates such as GLBA, HIPAA, FISMA, and PCI-DSS. In addition, LEG523 is associated with the coveted GIAC Law of Data Security & Investigations (GLEG) certification, which strengthens the credibility of forensics investigators as witnesses in court and can help a forensics consultant win more business
- Please visit the following website for additional information:

<http://www.sans.org/course/law-data-security-investigations>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - MGT415: A Practical Introduction to Risk Assessment

- In this course participants will learn the practical skills necessary to perform regular risk assessments for their organizations
- Please visit the following website for additional information:

<http://www.sans.org/course/intro-risk-assessment>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - MGT512: Security Leadership Essentials for Manager with Knowledge Compression

- This course is designed to empower advancing managers who want to get up to speed quickly on information security issues and terminology
- Please visit the following website for additional information:

<http://www.sans.org/course/security-leadership-essentials-managers-knowledge-compression>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - MGT514: IT Security Strategic Planning, Policy and Leadership

- In this course participants will learn the entire strategic planning process. Topics covered in depth include how to plan the plan, horizon analysis, visioning, environmental scans (SWOT, PEST, Porter's etc.), historical analysis, mission, vision, and value statements
- Please visit the following website for additional information:

<http://www.sans.org/course/security-strategic-planning-policy-leadership>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - MGT535: Incident Response Team Management

- This course will take participants to the next level of managing an incident response team. During this course, students will learn by applying course content through hands-on skill-building exercises
- Please visit the following website for additional information:

<http://www.sans.org/course/incident-response-team-management>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC301: Intro to Information Security

- This introductory certification course is the fastest way to get up to speed in information security. This entry-level course covers a broad spectrum of security topics and is liberally sprinkled with real life examples
- Please visit the following website for additional information:

<http://www.sans.org/course/intro-information-security>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC401: Security Essentials Bootcamp Style

- This course teaches participants the essential skills and techniques needed to protect and secure an organization's critical information assets and business systems
- Please visit the following website for additional information:

<https://www.sans.org/community/event/sec401-madison-12may2014-doc-blackburn>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC440: Critical Security Controls: Planning, Implementing and Auditing

- This course helps participants master specific, proven techniques and tools needed to implement and audit the Critical Security Controls as documented by the Council on CyberSecurity
- Please visit the following website for additional information:

<http://www.sans.org/course/critical-security-controls-planning-implementing-auditing>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC464: CyberSecurity Training for IT Administrators

- Unique training program for IT operations and admins that teaches them how to discover evidence of intruder activity, and demonstrate how to work effectively with their organization's security professionals
- Please visit the following website for additional information:

<http://www.sans.org/course/cyber-security-training-for-it-administrators>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC501: Advanced Security Essentials - Enterprise Defender

- This course builds on a solid foundation of core policies and practices to enable security teams to defend their enterprise. During this course, you will learn core components of building a defensible network infrastructure and how to properly secure routers, switches, and network infrastructure, Methods to detect advanced attacks of systems that are currently compromised, methods to detect advanced attacks of systems that are currently compromised, ways to respond to an incident, among others
- Please visit the following website for additional information:

<http://www.sans.org/course/advanced-security-essentials-enterprise-defender>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - FOR508: Advanced Digital Forensics and Incident Response

- This course will help to determine how the breach occurred, comprised and affected systems, what attackers took or changed, and incident containment and remediation
- Please visit the following website for additional information:

<http://www.sans.org/course/advanced-computer-forensic-analysis-incident-response>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC503: Intrusion Detection In Depth

- This training delivers the technical knowledge, insight, and hands-on training you need to defend your network with confidence
- Please visit the following website for additional information:

<http://www.sans.org/course/intrusion-detection-in-depth>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC504: Hacker Tools, Techniques, Exploits and Incident Handling

- The course is particularly well-suited to individuals who lead or are a part of an incident handling team. General security practitioners, system administrators, and security architects will benefit by understanding how to design, build, and operate their systems to prevent, detect, and respond to attacks
- Please visit the following website for additional information:

<http://www.sans.org/course/hacker-techniques-exploits-incident-handling>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC560: Network Penetration Testing and Ethical Hacking

- This course prepares participants to perform detailed reconnaissance by examining a target's infrastructure and mining blogs, search engines, social networking sites and other Internet and intranet infrastructure
- Please visit the following website for additional information:

<http://www.sans.org/course/network-penetration-testing-ethical-hacking>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC542: Web App Penetration Testing and Ethical Hacking

- SEC542 helps students move beyond push-button penetration testing to professional web application penetration testing that finds flaws before the adversaries discover and abuse them
- Please visit the following website for additional information:

<http://www.sans.org/course/web-app-penetration-testing-ethical-hacking>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC561: Intense Hands-on Pen Testing Skill Development (with SANS NetWars)

- With over 30 hours of intense labs, students experience a leap in their capabilities, as they come out equipped with the practical hands-on skills needed to address today's pen test and vulnerability assessment projects in enterprise environments
- Please visit the following website for additional information:

<http://www.sans.org/event/sans-2014/course/hands-on-penetration-skill-development>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC566: Implementing and Auditing the Critical Security Controls - In-Depth

- The course will teach how to master the specific techniques and tools needed to implement and audit the 'Twenty Critical Security Controls', a prioritized, risk-based approach to security
- Please visit the following website for additional information:

<http://www.sans.org/course/implementing-auditing-critical-security-controls>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC580: Metasploit Kung Fu for Enterprise Pen Testing

- This class will show students how to apply the incredible capabilities of the Metasploit Framework in a comprehensive penetration testing and vulnerability assessment regimen, according to a thorough methodology for performing effective tests
- Please visit the following website for additional information:

<http://www.sans.org/course/metasploit-kung-fu-enterprise-pen-testing>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC617: Wireless Ethical Hacking, Penetration Testing, and Defenses

- This course teaches participants how to identify the threats that expose wireless technology and build on this knowledge to implement defensive techniques that can be used to protect wireless systems. This course prepares participants to obtain GIAC Auditing Wireless Networks (GAWN)
- Please visit the following website for additional information:

<http://www.sans.org/course/wireless-ethical-hacking-penetration-testing-defenses>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC642: Advanced Web App Penetration Testing and Ethical Hacking

- This advanced pen testing course uses a combination of lecture, real-world experiences, and hands-on exercises to teach the techniques used to test the security of enterprise applications
- Please visit the following website for additional information:

<http://www.sans.org/course/advanced-web-app-penetration-testing-ethical-hacking>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SANS - SEC660: Advanced Penetration Testing, Exploit Writing, and Ethical Hacking

- This course shows penetration testers how to model the abilities of an advanced attacker to find significant flaws in a target environment and demonstrate the business risk associated with these flaws
- Please visit the following website for additional information:

<http://www.sans.org/course/advanced-penetration-testing-exploits-ethical-hacking>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

# Course Description

## SANS - SEC760: Advanced Exploit Development for Penetration Testers

- This course teaches the skills required to reverse engineer 32-bit and 64-bit applications, perform remote user application and kernel debugging, analyze patches for 1-day exploits, and write complex exploits, such as use-after-free attacks, against modern software and operating systems
- Please visit the following website for additional information:

<http://www.sans.org/course/advance-exploit-development-penetration-testers>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Business Practices

- Half-day course provides information on how agencies do business with MMO
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-3>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Compendium Overview

- This course provides a practical overview of the new compendium, with a focus on the overall structure, the guidance, the forms, and all parts of the compendium other than Parts II.A. and Part VII
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-4-B>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Construction Procurement - Written Determinations

- This course provides an understanding of requirements for and purposes of written determinations required by the Procurement Code, and how to write a determination meeting the requirements of law
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=OSE-1>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Contract Administration

- This full one-day course provides guidelines for a South Carolina State Government standardized approach to Contract Administration
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-1>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Ethics in Public Procurement

- This course gives a greater understanding of Ethics and how it impacts the day to day operations of public procurement
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-8>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: FOIA and Document Requests in SC

- This course is designed to help participants navigate the Freedom of Information Act, Procurement Code, and Trade Secrets Act and balance the need for disclosure with the need for maintaining integrity in the procurement process
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-7>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: FOIA's Meeting Rules & the Evaluation Process

- This course is designed to help participants conduct a competitive sealed proposal, including the evaluation process, in compliance with FOIA's meeting rules
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-6>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Issues in Guaranteed Maximum Price (GMP) Contracting

- During this course, students will learn about the components of a Guaranteed Maximum Price (GMP), pitfalls in GMP contracting and other issues related to the administration of GMP type contracts such as Construction Management at-Risk
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=OSE-3>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: IT Vendor Procurement Training

- One-day training program for vendors that provide information technology products and services to governmental entities within the State of South Carolina. This course is designed to help businesses be more successful doing business with government
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=ITMO-1>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Legal Aspects of Purchasing

- This course will provide information that is critical to ensuring all procurements have a solid legal foundation and legal issues that you may face on a day-to-day basis
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-4-A>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

# Course Description

## SC: Procurement Code in a Nutshell

- Half-day course focuses on demystifying the code and identifying the requirements most Procurement Officers need to know
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-2>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Procurement of Architect / Engineer Services

- During this course, students will learn what services qualify as professional design services and the steps and procedures for procuring professional design services in compliance with the requirements of the Procurement Code
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=OSE-2>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Request for Proposal (RFP) Process

- During this course, participants will be taken through the processes from beginning to end and also learn the common pitfalls associated with Request for Proposal (RFP)
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-5>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Standard General Bidding Instructions

- This training provides a better understanding of the information necessary to publish good bidding documents
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-4-C>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SC: Standard Terms & Conditions

- This course will focus on the standard terms and conditions of the "Uniform State Provisions & Clauses" a/k/a/ the "Compendium"
- Please visit the following website for additional information:

<http://procurement.sc.gov/PS/training/PS-training-classes.phtm?number=MMO-4-D>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## SEI Certification: Certified Computer Security Incident Handler (CSIH)

- The CERT-Certified Computer Security Incident Handler (CSIH) certification and Clearmodel training program to support the needs of military, civilian, and contract personnel who handle information systems
- Please visit the following website for additional information:

<http://seicertification.clearmodel.com/get-certified/computer-security/cert-certified-computer-security-incident-handler/>

*Go back to [InfoSec and Privacy Training by Competency](#)*

*Go back to [InfoSec and Privacy Training by Certification](#)*

*Go back to [InfoSec and Privacy Training by Position Description](#)*

# Course Description

## State of South Carolina Data Classification Training

- This self-paced training explains the State of South Carolina data classification model created to categorize the State's data for efficient use and protection
- Please visit the following website for additional information:

[http://dis.sc.gov/resources/Documents/Data\\_Classification\\_Training\\_Deck\\_Abbreviated.pdf](http://dis.sc.gov/resources/Documents/Data_Classification_Training_Deck_Abbreviated.pdf)
